SUMMARY

Software Developer with a focus on full-stack development and AI integration, with experience shipping production-grade applications across scheduling, automation, and developer tooling. Built and deployed LLM-powered systems including an agentic DevSecOps engine that cuts remediation time to under 4 minutes and a vibe coding platform that goes from prompt to live deployment in under 60 seconds. Proficient in Node.js, React, Python, and Java, with hands-on experience across multiple LLM APIs, agentic AI pipelines, and real-time systems.

EXPERIENCE

Linkcode Technologies

Pune, India

Software Engineering Intern

Jun 2025 – Aug 2025

- Built an AI Scheduler (OpenAI API, Node.js) that reads natural language chats and extracts dates, subjects, and availability, turning a multi-step scheduling process into one conversation.
- Wrote a context-aware messaging assistant (Express.js, MongoDB) that tracks conversation history to generate relevant reply suggestions across multi-turn sessions.
- Built a chat parser that scans pasted conversations, pulls event details (date, title, time), and fires Google Calendar API calls to create entries automatically. Users went from rereading 20+ messages to zero manual steps.

PROJECTS

Code Ignite – AI-Powered Vibe Coding Platform

React, TypeScript, OpenAI API, Netlify, GitHub API | [Website](#)

2026

- Built a browser-based platform that converts natural language and speech-to-code prompts into fully functional multi-file static web projects, from prompt to live Netlify deployment in under 60 seconds.
- Designed a custom virtual router and sandboxed preview engine that handles multi-page navigation and asset resolution entirely in-browser, requiring zero server-side rendering.
- Integrated one-click GitHub push and Netlify deployment, enabling users to go from AI-generated code to a shareable URL without leaving the editor.

Chat-Based AI Scheduler – AI Calendar Automation Assistant

Node.js, Express.js, MongoDB, OpenAI API, Google Calendar API | [GitHub](#) | [Live Demo](#) | [Demo Video](#) 2025

- Built an AI-powered productivity assistant that converts unstructured daily chats into actionable calendar events by extracting dates, times, and event titles using the OpenAI API.
- Automated end-to-end Google Calendar scheduling, enabling users to instantly transform conversational text into organized schedules without manual event creation.
- Implemented persistent session management and real-time calendar synchronization using MongoDB and Google Calendar APIs for seamless multi-session scheduling workflows.

ARCE – Autonomous Remediation & Compliance Engine

DevSecOps, AST Analysis, Agentic AI | [GitHub](#) | [Live Demo](#)

2025

- Built an autonomous DevSecOps agent that detects supply chain vulnerabilities, verifies exploitability through AST analysis, patches vulnerable code, self-corrects test failures using agentic reasoning, and submits governed pull requests with compliance audit trails.
- Reduced mean-time-to-remediate (MTTR) from days to under 4 minutes with zero manual intervention.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C, C++, SQL

Frontend: React, HTML, CSS

Backend: Node.js, Express.js, REST APIs, MongoDB, Supabase

AI / APIs: OpenAI API, Google Calendar API, GitHub API

Tools: Git, Netlify, Vercel, Claude Code, n8n, Eclipse

Concepts: OOP, Data Structures, API Integration, Real-time Web Apps, Database Design

VIRTUAL EXPERIENCES & ACHIEVEMENTS

NextBench Ignite Hackathon – 2nd Prize Winner

Frontend Development Hackathon

2025

- Won 2nd place by building a fully functional frontend application; deployed at nextbench-ignite-launch-k6qo.vercel.app.

Tata Cybersecurity Security Analyst Simulation

Virtual Experience Program (Forage)

- Focused on Identity and Access Management (IAM), applied cybersecurity best practices, and delivered IAM strategy documentation.

Mastercard Cybersecurity Virtual Experience

Virtual Experience Program (Forage)

- Worked as part of the Security Awareness Team, identified phishing threats, and recommended targeted employee training programs.

EDUCATION

Cusrow Wadia Institute of Technology

Diploma in Computer Engineering

Pune, India

Expected May 2026

LEADERSHIP & EXTRACURRICULARS

Green Club – Team Leader

Cusrow Wadia Institute of Technology

- Led campus sustainability initiatives and awareness campaigns, coordinating a team of volunteers across multiple drives.
